(2007) DST Instruction Sheet

All RTC time switches and time base coordinators have the capability of reprogramming DST from their integral keyboard.

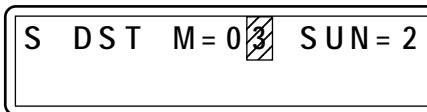

How To Program the 2007 Daylight Savings Time (DST)

From the MAIN DISPLAY, press 7 (DST) then the ENTER key (*):

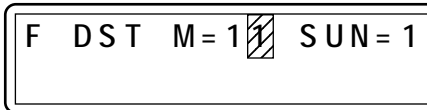

The time switch will default to the old U.S. law. Key in the new DST as follows:

S (Spring), M=03 (March), SUN=2 (Second Sunday).

F (Fall), M=011 (November), SUN=1 (First Sunday).

The display will revert to the main screen after entering the Fall Sunday.

Time Switch Firmware

Microprocessors programmed with the 2007 DST will be available for purchase for most RTC time switches.

Time switches with a firmware version older than 2.00 cannot be upgraded.

Press 99 then Enter to display the version number of a time switch.

TRCOMP (21PC) Computer Software

An upgrade to the TRCOMP (21PC) software for programming AP21T and AP21TR time switches will be available to current users at no charge.

Please call RTC with the agency name and address to receive this upgrade.

CPR III System Software

The CPR III System Software gets its time-of-day reference from Windows (tm). When you upgrade your Windows (tm) software to the 2007 DST, the CPR program will automatically change.
